RESUME

OBJECTIVE

To obtain a position as a Front End / JavaScript Developer with a company that allows me to demonstrate and broaden my creative and technical skills

SKILLS

- JavaScript (Node.js, React.js, jQuery), HTML 5, CSS 3 (LESS and Sass), working knowledge of LAMP Stack
- Responsive Web Design, SEO / SEM, Standards Compliant, Cross-browser Compatible
- Git, GitHub, JIRA, Dreamweaver, Photoshop
- Google APIs, Twitter API, Facebook API, Yelp API, etc.

WORK EXPERIENCE

Self-Employed

Full Stack JavaScript Developer / January, 2015 – Present

For the last couple of years, I received various requests to build a wide range of web projects, from simple websites that were mostly HTML5, CSS3 and plain JavaScript to advanced Node.js applications. Lately I have become a big fan of the Meteor/React.js combination and all of the latest applications I built were based on the Meteor web framework. Since most of the projects were private and I can't share the code, I built a few examples and posted them on GitHub to demonstrate the concepts.

- Worked on various projects using some of the latest JavaScript technologies – Node.js, Meteor, React.js

Contract

Full Stack Developer / May, 2014 – January, 2015

In this position, I was a full-time contract developer for a local small business. I built a client scheduling system per the customer requirements given to me directly from the business owner, and I was in charge of organizing all of the web assets the business had.

- Developed and designed a complete client scheduling system using HTML5, CSS3, JavaScript, PHP, MySQL
- Organized all of the web assets belonging to the business
- Improved existing company website
- Built an SEO friendly website for a second business location

Praetorian Digital, Inc.

UI Developer / December, 2011 - May, 2014

As the leading online media company for public safety professionals, Praetorian Group empowers police, firefighters, paramedics and other emergency responders with news and training information to help them protect their communities. As the sole Front-End Developer (UI Developer) at Praetorian Group, I was ultimately responsible for ensuring Praetorian Group's websites were accurately represented on desktop browsers and mobile devices, as well as weekly newsletters.

- Developed new functionality and deliver enhancements to an existing CMS, and fix defects, using JavaScript/HTML/CSS
- Developed standards-compliant and cross-client/browser HTML, CSS, and JavaScript for various projects, focusing on mobile and desktop. Work directly with designers, back-end developers and project managers to create pixel-perfect webpages.

MDK Group, Inc.

Front-End Developer & SEO Specialist / September, 2010 - December, 2011

MKD Group is a group of young professionals who help local businesses be more successful online. Its primary goal is to manage the web design and development process for small businesses to communicate their message. As a Front-End developer I was in charge of listening to the client's requirements as well as come up with my own suggestions through our website design service.

- Designed, developed and maintained database-driven web solutions for local businesses, and reported directly to the owner
- Responsible for all HTML, CSS, and JavaScript production for both new and existing web projects

PORTFOLIO

Praetorian Digital, Inc. - San Francisco, CA
Primary responsibilities included taking designs and turning them into fully functional, standards compliant, cross-browser HTML templates. Skills Used: HTML(5), CSS(3), JavaScript, jQuery, Responsive Design.
